

REGULAR MONTHLY MEETING OF THE BOARD OF DIRECTORS

OF

LA CAÑADA IRRIGATION DISTRICT

The Regular Monthly Meeting of the Board of Directors of La Cañada Irrigation District was held on Tuesday, April 11, 2023, at the office of the District, 1443 Foothill Boulevard, La Cañada, California.

President Myers, Vice President Angelica and Directors Butts, Collins and Soohoo were present. Also in attendance at the meeting were Mark A. Spraic, legal counsel of La Cañada Irrigation District ("LCID"); Douglas M. Caister, Manager of LCID; Justin P. Bailey, Assistant Manager/Secretary of LCID.

REVIEW OF MATTERS RAISED BY PERSONS APPEARING BEFORE THE BOARD:

None.

APPROVAL OF MINUTES:

A general discussion was held concerning the Minutes of the Regular Monthly Board of Directors Meeting, which was held March 14, 2023. On motion duly made by Vice President Angelica and seconded by Director Butts, and unanimously approved by President Myers, Vice President Angelica and Directors Butts, Collins, and Soohoo, the Minutes were adopted and ordered filed.

APPROVAL OF REPORTS:

President Myers noted that the Secretary's Report, Treasurer's Report, Revolving Fund Report, Report of Inactive Public Deposits, Operating Statement, Production and Distribution Report, and Work Order Progress Report for the month of March 2023 had been distributed to the Directors. These reports were discussed at length, and approved on motion duly made by Director Butts, seconded by Vice President Angelica, and unanimously approved by President Myers, Vice President Angelica and Directors Butts, Collins, and Soohoo.

SUPERINTENDENT'S REPORT:

The Manager noted that the Superintendent's Report for the month of March was distributed to the Directors at the meeting. A general discussion was held concerning the same, and upon motion duly made by Director Collins, seconded by Director Soohoo, and unanimously approved by President Myers, Vice President Angelica and Directors Butts, Collins, and Soohoo, the following resolution was adopted:

Regular Monthly Meeting
April 11, 2023

RESOLVED: That these reports be attached to the Minutes as an Exhibit.

2021 District Audit Update:

Assistant Manager Bailey informed the Board that the District has hired a CPA to assist with specific reconciliations requested by the auditors performing the 2021 Audit. The Board held a brief discussion, and the matter was tabled.

New Field Employee Start Date:

Assistant Manager Bailey reported that the District has hired a new Water Systems Operator, Daniel Doherty, who was to begin work on April 17, 2023. He further advised the Board that Mr. Doherty has previous experience in water-related construction services and equipment operation and has expressed an eagerness to apply his skills immediately for the District and promptly pursue the Distribution and Treatment certification process required by the State of all District field personnel.

Raymond Basin Monk Hill Operations:

Assistant Manager Bailey informed the Board of the previously discussed proposed reductions in pumping and extraction of ground water from the Monk Hill portion of the Raymond Basin. He noted that the District's annual production will be reduced by 24 acre feet (24%) to 76 acre feet and access to Long-Term Storage balances will be paused for all parties to avoid further reduction of the Basin's very low static levels. He also stated that the District will seek an exemption with respect to a portion of the District's long term storage that has accumulated since 2016 as a result of a State Department of Drinking Water regulation accounting to approximately 600 acre feet. This portion of Long Term Storage would have normally been pumped at a rate of 100 acre feet per year.

Conservation Status Update:

The Board was advised that Foothill Municipal Water District has informed its Member Agencies that the conservation measures will be downgraded to Green, Voluntary, which calls for customers to limit outdoor watering to Odd & Even days based on the last digits of their addresses and to fix leaks within 72 hours of discovery.

Roof Repairs at Reservoir 9, Castle Station and Baptiste Site:

Manager Caister reported that Foothill Roofing will be making roof repairs at three District sites during April, weather

permitting. The roof at Reservoir No. 9 has not been worked on since early 2000, more than 20 years. It has developed a few sections which require repair and some structural work which will require removal and replacement of wood and asphalt material before it can be completed. The Castle Pumping Station and Baptiste Well Site both require remedial roof repairs and patch work around the flashing and sheet metal as well as wall joints and roof penetrations. The contractor has advised that the pumping stations will require a day each and the reservoir roof will require 2 days of effort.

District 2005 Case Backhoe Maintenance:

The Board was informed that the District's Backhoe/Loader is scheduled for an overall mechanical inspection and service with several identified repairs. The work will be performed by Sonsray, a local Case Equipment specialist. The estimated cost for the work to be performed is \$29,000 which is substantially less than the cost to replace. The Board held a brief discussion and noted the importance of the Backhoe to the District and the necessity to attend to the equipment.

Single Family Residence Additions:

Manager Caister stated that Accessory Dwelling Units are rapidly becoming a District-wide occurrence as reflected by the number of City of La Canada - Flintridge building permits issued in the last 18 months. He noted that it may be necessary and appropriate for the District to develop a policy which will require any additional water service connections made to an existing single family residence to be treated as new development and require the District to charge a Development Fee in addition to the cost of new meter installation and/or service upgrade. The Board held a general discussion concerning the potential demand that additional service connections will have on the District's infrastructure and fire protection requirements, which are not incorporated by the City into its review or permitting process. The staff was instructed to investigate the matter further and report back at the next meeting of the Board.

ADJOURNMENT INTO CLOSED SESSION:

The Regular Meeting was adjourned at 8:17 p.m. into closed session pursuant to Government Code Section 54956.8, Real Estate Negotiations with regard to the potential acquisition of a reservoir site.

RECONVENING OF THE REGULAR MEETING OF THE BOARD:

The closed session was adjourned, and the Regular Meeting of the Board was called to order by President Myers at 8:44 p.m.

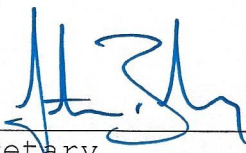

As there was no further business to come before the Board, the Meeting was duly adjourned.

President

SUPERINTENDENT'S REPORT

April 2023

Service Replacements:

Brkich Construction replaced two leaking services during April. A 50-year-old 1" copper service in the 900 block of Vista Place and a 1" plastic service in the 1000 block of Olive Lane. Allen Pipeline replaces a leaking ¾" service in the 4900 block of Castle Rd. All new material was used. The excavations in the street at each location required the new, very costly, backfill and restoration materials imposed by the City of La Cañada Flintridge.

Reservoir No. 7 Roof Replacement:

CORA Contractors completed the first pour of 100 yards of concrete forming four of the new wall sections. The second set of four wall sections will be poured in May, completing the entire perimeter of the reservoir walls. The new walls will provide the foundation support for the steel reservoir walls and roof installation. The wet weather this first 4 months of the year has significantly slowed down the reservoir project.

Roof Repairs Underway:

The generator exhaust venting at Castle Rd. Station required professional repairs to stop roof leakage around the areas where it penetrates vertically through the existing roof. At the District's Well site on Baptiste Way, the corrugated metal roof covering above the emergency generator was resealed along the wall / roof transition. No. 9 Reservoir had 2 sections of roof removed and underlying structural wood repairs prior to the torch down material being replaced. The condition of the wood support structure was very poor. Repairs were focused on the worst areas as not to disturb and create more instability or leaks.

Fence Repairs:

Western Fence Co. made repairs to the fencing at Los Amigos Reservoirs and at Old Landmark Lane Reservoir during the month. Each site required only small sections of damaged fence to be restored.

New Service Installation Journey's End:

The District Crew installed a new 1" copper service at 1230 Journeys End Dr. This new service meter was installed as part of a lot split, where 2 new residences are under development now. The costs for the new service, and all street restorations have been passed through to the new property owners.

Pickens Canyon Main Sample Tap Repair:

The District Crew discovered a small leak in the 6" gravity main running along the west side of the canyon near the top of the Canyonside Rd. embankment. The leak was occurring at a small rusted out sample connection. New fittings and a new sample tap were installed to make the repairs.

Water Samples Tested During April:

All distribution samples tested during the month met safe drinking water standards.

Weekly - Bacteriological
System: 14
Pickens: 16

Weekly - Chlorine Residual
System: 231
Pickens: 48
